

Puppy with Lamb

- [Feeding Guide](#)

Each dog is different; depending on his activity level and body condition, food amounts may need to be adjusted.

Daily feeding amounts for puppies (grams per day):

	Expected adult body weight	6 weeks to 3 months	3 to 5 months	5 to 8 months	8 months to 12 months	1 to 2 years
	1-5 kg	25-110	40-130	45-125	40-130	Adult
	5-12 kg	70-230	110-290	130-280	130-280	Adult
	12 -25 kg	125-400	230-500	290-440	280-420	Adult
	25-45 kg	210-580	400-790	500-830	440-690	420-580

	45-70 kg	280-690	580-1090	790-1080	830-1080	690-950
-----------------------------------------------------------------------------------	----------	---------	----------	----------	----------	---------

Recommended number of feedings is as follows: Feed puppies under 3 months of age 3-4 daily feedings of moistened food. After 3 months of age gradually reduce moistening and feed 3 times per day. From 6-12 months provide 2 daily feedings. Feed them according to the recommendation table and avoid overfeeding to maintain a lean body condition during growth. Each puppy is different; depending on his activity level and body condition, food amount may need to be adjusted. Feeding during gestation and lactation: During the last 3-4 weeks of pregnancy and while nursing, food allowances should be increased 1.5 to 2 fold maintenance levels. After weaning, the mother's food should be adjusted to maintain her at an ideal body condition. Fresh, clean drinking water should always be available. For adult toy dogs of 1-5kg feed 30-120 g/day.
