

# TAILOR MADE NUTRITION FOR YOUR GERMAN SHEPHERD PUPPY UP TO 15 MONTHS OLD

## Your puppy needs special nutrition

Growth is an essential stage in your dog's life: it is the time of big changes, discoveries and new encounters. During this key period, your puppy's immune system develops gradually. ROYAL CANIN® German Shepherd Puppy helps support your puppy's natural defences, thanks particularly to a complex of antioxidants – including the essential vitamin E. ROYAL CANIN® German Shepherd Puppy contains an exclusive combination of nutrients that help to support optimal digestive health.

1

Due to the intense metabolic activity, a puppy requires up to twice more energy than an adult dog

2

During the growth period the immune system needs support

3

The digestive system of a puppy is not fully mature, and can be supported by a specific combination of nutrients

## ADAPTED KIBBLE SHAPE

### Exclusive kibble

The kibble's shape, size, texture and formula are adapted to the German Shepherd puppy.

### Healthy Skin & Coat

This formula helps support the skin's "barrier" role (exclusive complex) and maintain skin and coat health (EPA & DHA).

### Bone & Joint Health

This specific formula helps support healthy bones and joints and maintain ideal weight. Enriched with EPA & DHA.

### Digestive performance

Contributes to supporting digestive health while taking into account the German Shepherd's digestive sensitivity, thanks to highly digestible proteins and a selection of specific fibres to limit intestinal fermentation while supporting a balance in the intestinal flora.

## DRY FOOD BENEFITS

### KIBBLES:

- Immune system support
- Digestive performance
- Bone & joint health
